Guest Speaker @ 12:45 approx.

Dr. Bill Code Author of "Winning the Pain Game", www.drbillcode.com

Our featured speaker, started his medical career firmly entrenched in the western model of medicine. As a Board Certified Anesthesiologist in Canada and the United States, he recruited and taught Anesthesiology residents. He also spent six years in brain research and drug therapy for chronic pain. But his paradigm shifted dramatically at the age of 42 when he was diagnosed with Multiple Sclerosis. Western medicine had little to offer him and he began seeking healthy, non-drug solutions to manage the neurological deterioration, depression and pain. His journey has been a remarkable discovery of the wonders of nature and has completely changed the way he views health. His hope is that you will use this information to improve your health and brain function. A decade ago he thought his diagnosis was a death sentence. Today he travels the world, lectures and enjoys all aspects of life. Come and listen to some key concepts and strategies that you might find helpful in dealing with pain and illness. His books will be available to purchase and a period of time at the end of the Q & A with the audience will be for book signing.

RSVP. We hope to see you there!

Our Mission: To be a leader in finding a cure for multiple sclerosis and enabling people affected by MS to enhance their quality of life. **HELP END MS!**
